Introduction to Individual Retirement Accounts

This section addresses the administration of Individual Retirement Accounts (IRA). IRAs are personal retirement plans created or organized in the United States for the exclusive benefit of an individual. They must be in the form of a trust or custodial account and they must satisfy all the requirements outlined in Section 408 of the Internal Revenue Code (IRC) as well as related tax regulations. The laws and regulations have been changed numerous times over the years so it is always best to check the most recent version of Section 408 as well as related regulations to see if the IRA accounts meet the conditions specified in the IRC and regulations. The Department of Labor (DOL) does not have jurisdiction over nonemployer sponsored IRAs as they do not fall under Title I of the Employee Retirement Income Security Act (ERISA). However, the DOL has been given authority to issue interpretations of Section 4975 of the IRC involving prohibited transactions of IRAs. There are some prohibited transaction class exemptions issued jointly by the DOL and the IRS involving IRAs and advisory opinions issued by the DOL, discussed later on in this section. Simplified Employee Pension

(SEP) IRAs established by an employer under Section 408(k) of the IRC are subject to ERISA Sections 404 and 406 covering fiduciary responsibility and prohibited transactions. Savings associations must have fiduciary powers in order to be either a trustee or custodian for SEP IRA accounts. This section does not

apply to SEP IRAs.

IRAs have several tax advantages, such as:

- ☑ Contributions made to an IRA may be fully or partially deductible, depending on which type of IRA is established and on the circumstances of the individual, and
- ☑ Generally, amounts in an IRA account (including earnings and gains) are not taxed until distributed. In some cases, amounts are not taxed at all if distributed according to the rules.

Many savings associations offer individual retirement account services to their customers. A savings association will provide these services in one of two capacities, "trustee" or "custodian." In order to determine if the savings association is serving as trustee or custodian of an IRA account, look at the form used to establish the IRA account. The top line of Form 5305, an IRS Form that is a model trust agreement states – "Traditional Individual Retirement Trust Account." The top line of Form 5305-A, another IRS Form that is a model custodian account states – "Traditional Individual Retirement Custodial Account." The language in the two forms is identical except one uses the term trustee and the other uses the term custodian.

Savings associations never need fiduciary powers when acting as a custodian to IRA or any other types of accounts. OTS regulations, at 12 CFR § 550.580, permit savings associations to act as trustee of IRA accounts established under Section 408(a) of the IRC without having fiduciary powers. If the savings association does not have fiduciary powers, it must limit the investments of the IRA account to its own

depository products, its debts or securities, or it may only act in a directed capacity under 12 CFR § 550.600(b). A directed trustee does not make investment decisions or provide any investment advice; it simply follows the investment directions of the IRA accountholder. When a savings association is acting in a directed capacity it generally will allow the IRA accountholder to invest the assets of the IRA account bank deposits, stocks, bonds, or mutual funds.

If the states association does not have fiduciary powers it must still observe principles of sound fiducial administration, including those related to recordkeeping and segregation of assets (12 CFR § 550.590). So that associations without fiduciary powers must also abide by the rules of fiduciary conduct established in the regulations at 26 CFR § 1.408-2(e)(5) relating to:

- The administration of accounts The owners or directors of the savings association will be responsible for the propert administration of accounts. A written record will be made of the acceptance and of the alinquistances or closing out of all IRA accounts and of the assets held for each account. All encloses taking part in the performance of IRA duties will be adequately bonded. Legal counsel shall be appleaded or retained to be readily available.
- Audits At least once during each 12, but h relied, there will be a detailed audit by a qualified public accountant of the savings association? 2008 and records relating to IRA accounts.
- Funds awaiting investment or distribution. Funds are in an IRA account by the savings association awaiting investment or distribution will use the head uninvested or undistributed any longer than is reasonably necessary for the proper conagement of the account.
- Custody of investments The investments of each account will be the commingled with any other property except for investments in a collective investment fund. Assets of accounts requiring safekeeping will be deposited in an adequate vault. A record will be kept of assets deposited in or withdrawn from the vault.
- Collective investment funds The assets of an account may be pooled in a collective investment fund.
- Books and records Records of the IRA accounts must be kept separate and distinct from other records. An adequate record must be kept of all pending litigation relating to IRA accounts to which the savings association is a party.

Savings associations with fiduciary powers often provide investment advice or investment management to IRA accountholders, particularly for rollover IRA accounts. A rollover IRA account is established when a customer withdraws cash or other assets from a retirement plan and contributes those assets within 60 days to another eligible retirement plan (such as an IRA account). This often happens when an individual retires with a 401(k), 403(b) or 457 retirement plan and chooses or is required to transfer the assets of that plan into an IRA account. Many financial experts encourage retirees to rollover in order to gain maximum control over their retirement funds, particularly when the company retirement plan has limited investment choices or high fees.

TYPES OF IRAS

There are two primary types of nonemployer sponsored IRAs, traditional IRAs and Roth IRAs. Traditional IRAs are generally funded by individual contributions which may or may not be tax deduced. Distributions are taxable income to the recipient. Contributions to Roth IRAs are on an after tax basis and distributions are generally tax free. Traditional IRAs are subject to various minimum contribution rules when the owner attains age $70^{1}/_{2}$ or dies. There are no minimum distribution rules with 10th IVas abile the owner is alive. With both types of IRAs there are various eligibility and contribution in the iteration.

CONTRIBUTION L MIT

Annual contributions to ditional IRAs are generally tax deductible for the owner. This is not tax Butions are taxable income to the owner or beneficiary. If the avoidance; it is only a del ral as dis etirement plan, contributions are always deductible. If the owner is not covered by another aify owner is covered by a qualified plan d te scertain income limits which are adjusted based on inflation. For Roth IRAs, contributions a Fer Aductible. There are limits on the amount of annual income the owner may have and if he ле с this amount, they may be limited or precluded Jee. from making a contribution. Additionally, they are an hal contribution limits based on the owner's age for all forms of IRAs. Because these various limits are constead based on inflation, please refer to ear. current IRS guidance for the specific limits in any give he contribution limitations apply to all IRA accounts an individual may possess regardless the the individual may apportion the total annual limit among two or more accounts, but the overa be exceeded. limit r

Generally, contributions to an IRA must be in cash. The only contribution is for rollovers from a qualified plan or another IRA. Any other contribution of property would constitute a prohibited transaction.

ROLLOVERS

A rollover is a tax free distribution to the accountholder of cash or other assets from one retirement plan that is subsequently contributed to another retirement plan. Both traditional and Roth IRAs may accept rollovers from qualified employee benefit retirement plans, such as a 401(k) plan, a 403(b) or 457 plan. With traditional IRAs, this is generally a tax free event; however, the owner will be subject to taxation in the year of the rollover for rollovers to a Roth IRA.

Rollovers can be made by direct transfer from the trustee of the qualified plan to the IRA or by the plan issuing the funds to the participant who then has 60 days to place them in the rollover IRA. If the later option is used, the qualified plan must withhold 20% of the distribution for income taxes. The account holder would then have to obtain these funds from a different source in order to avoid some of the distribution being taxable.

DISTRIBUTIONS

Distributions from traditional IRAs are taxable events to the recipient. Additionally, if the owner takes distributions prior to attaining the age of 59¹/₂, these distributions are generally subject to a 10% penalty tax. Then are several exceptions to the penalty tax that may be applicable. Again, these rules have his strally seen subject to adjustments and modifications, so refer to current IRS guidance for the best taxable.

As, the owner must begin taking required minimum distributions on an annual basis For tra wing the year he or she turns 70¹/2. This is known as the required beginning by April 1 E the date. If there str utions or the distributions are not large enough, a 50% excise tax on the re amount not dist bute may be imposed. The required minimum distributions are based on the individual's life exp nined by IRS tables and the value of the account as of December 31 dete of the preceding year.

In the event the owner dies before as other required beginning date, the rules vary based on whether the beneficiary is the IRA owner's to be and on whether a beneficiary was named in the IRA agreement.

If the beneficiary is the IRA owner's spouse the spouse has the option of leaving the funds in the deceased spouse's IRA and taking distributions based on the decedent's required beginning date or rolling the funds into his or her own IRA and taking a tributions based on his or her own required beginning date.

If the decedent is named in the IRA agreement, distributions are based on the beneficiaries' life expectancy in the year of the owner's death reduced by one for the year after the year of death. Distributions generally begin in the year following the decedent's weath.

When no beneficiary is named or an estate or trust is named, the entire account must be distributed by December 31 of the fifth year following the owner's death.

If death occurs after the owner's required beginning date, distributions are based on the longer of the beneficiary's life expectancy or the life expectancy of the decedent at the time of death, again reduced by one for each year after the year of death.

For Roth IRAs, the owner is never required to take a distribution, but beneficiaries (other than the owners' spouse) are subject to the distribution rules.

INVESTMENTS

The trustee or custodian of any IRA may act in a directed capacity or may have investment responsibilities. In order for a trustee or custodian that is subject to OTS supervision to have investment authority, it must have been granted fiduciary powers by OTS. In the event the account is managed, the IRA agreement or a second ancillary agreement should clearly define the duties and

responsibilities of both the savings association and the account holder. For those accounts where the institution has investment responsibility, the OTS fiduciary regulations at 12 CFR Part 550 apply.

Generally, an IRA can hold assets similar to those held by traditional trusts, but there are exceptions. Most a cably, IRAs are strictly prohibited from holding life insurance and most collectables under Section $40\times1/3$ of the IRC. There is an exception in Section 408(m)(3) for bullion coins issued by the Valee cases or any state therein.

all **R**A investments be registered or titled in the name of the IRA or a nominee name It is cr for the IK trusice. J Lition, the IRA trustee must take possession of the evidence of ownership of los g of a purchase of property for example, the representative of the IRA that property At the trustee should be rese , sign the necessary documents, and present a check drawn from the IRA. If the IRA account he to property and have the property titled in his or her own ace the investment into the IRA account, a prohibited transaction would name and then want to occur because the IRA acc nt holde yould be seen as selling the investment to his or her IRA.

The trustee or custodian is free Image more restrictive investment rules under its policies and can substantially limit the types of assets the a by It chold as investments. Savings associations, whether they are trustee or custodian of the IRA a responsibility to provide a fair market value of Jur Jav quent they should make sure they are appropriately the IRA assets at the end of each year. Cor bay for an appraisal of investments such compensated or the IRA account has adequat liqui ss∈ lose held stocks. These assets are generally as real estate, private placement limited partnerships, a not actively traded and present a challenge in determi ig a r m2 et value.

Examiners should note that although IRA account assets are cermitted under Section 408(a)(5) of the IRC and the OCC's rules at 12 CFR § 9.18 to be invested a bank ollective investment funds, such investments would trigger problems for the collective fund under the securities laws. The Securities and Exchange Commission (SEC) has stated that if IRA account assets are invested in a collective fund, the fund will be considered in violation of the Securities Exchange Act of 1933 ('33 Act) and the Investment Company Act of 1940 ('40 Act) unless the collective fund is registered with the SEC as an investment company (mutual fund) under the '40 Act and the shares registered as securities under the '33 Act.

Certain investments could generate unrelated business taxable income (UBTI) resulting in the IRA paying income taxes at trust rates. IRA trustees and custodians are responsible for filing Form 990-T and paying unrelated business taxable income from the IRA. An IRA can generate UBTI in one of two ways:

- Operation of a business An example would be where the IRA account holder wants to direct his or her IRA to purchase and operate a franchise. If that franchise generates more than \$1,000 per year in income, the IRA trustee/custodian would be required to file Form 990-T and pay taxes on that income.
- Debt financed income If an IRA uses debt to enhance its investment returns, earnings attributable to that debt are subject to the UBTI tax. An example would be where the IRA account holder directs the IRA trustee to purchase unimproved real estate in his or her IRA and

then borrow against that real estate to make improvements to the property. In such a case, the earnings attributable to that debt would be subject to the UBTI tax.

PROFILITED TRANSACTIONS

e) (2) of the IRC states that IRAs are exempt from taxation unless there is a violation of the ion rules in Section 4975. These prohibited transaction rules are similar to the prohib ed tr led ction rules of qualified retirement plans under ERISA. Section 4975 prohibits an IRA prohib ted transactions with "disqualified persons," which are defined similarly to from eng ng i ERISA. These rules generally preclude the owner of an IRA and certain "parties in in rest de er and his or her spouse from having any involvement with the IRA holdings relatives of both e ov other than directing 5tt ATS.

vaction rupof Section 4975 apply to all IRA accounts, certain investments ble fiould be avoided as they create a greater likelihood that a Because the prohibited tra such as real estate, although perm' able prohibited transaction could take but the IRA account holder and ce ain ar y mombers cannot have any involvement with the real estate. The account holder cannot live λQ the property manager. Even certain seemingly inconsequential acts by the account holder ch as learing debris off of the land may result in a prohibited transaction and the property could .de/ ed. buted to the owner.

An IRA can both borrow in its individual capacity are many loane to other individuals or entities, but there are specific limitations on each. If the IRA bon, we fund, the loan cannot be secured by any assets held outside of the IRA and may not be guaranteed by the acount holder or certain family members. Additionally, the IRA account holder may not please the acount as security for a personal loan. Failure to follow these rules will result in a prohibited transaction.

An IRA may act as a lender, but again subject to strict rules. Loans may not be made to the account holder or certain members of the account holder's family. The account holder may not benefit in any way from the loan. Any such activity by an IRA should be well documented.

There are two prohibited transaction class exemptions relating to financial institutions and IRA accounts. These class exemptions are described below:

Prohibited Transaction Exemption (PTE) 93-1 (sometimes referred to as the free toaster exemption) – permits individuals to receive cash, premiums, or other consideration paid by a financial institution in connection with the establishment of or the additional contributions to an IRA or a Keogh Plan (retirement plan for a self-employed individual), provided that certain conditions are met. The conditions must be met in order for individuals not to have their IRAs lose their tax exempt status due to a violation of the prohibited transaction provisions of Section 4975. The conditions are:

• The IRA or Keogh Plan in connection with which cash, property, or other consideration is given, is established solely to benefit the participant, his or her spouse and their beneficiaries;

- The cash, property, or other consideration is given only in connection with the establishment of the IRA or Keogh Plan or the making of an additional contribution, including the transfer of assets from another plan, to an existing IRA or Keogh Plan;
- Four any taxable year, the total of the fair market value of the property or other consideration of the lonsor of the IRA or Keogh Plan, and the cash received is not more than: (1) \$10 for decrease to be IRA or Keogh Plan of less than \$5,000; and (2) \$20 for deposits to the IRA or Keigh Plan of \$5,000 or more.
- In any use when the consideration provided by a financial institution to an individual for whose benefitten a A or Keogh Plan is established or maintained, is group term life insurance, the limitations about shelling apply to the provision of such insurance if, during any taxable year, no more than \$5,000 of the face value of the insurance is attributable on a dollar for dollar basis to the assets of the IRA or Keogh Plan.

Prohibited Transaction Exemption (2) 93-33 – permits individuals to receive services at reduced or no cost from a financial institution w Simplified Employee D en *L*e deposit balances of the individual's IRA, Keogh or Simplified Employee Pension (SEP) (per , pl₂ bject to Title I of ERISA) account are taken into elio consideration for purposes of determinit Lity receive banking services at reduced or no cost (relationship banking). There are several constitions, at <u>must</u> be met in order for individuals not to have their IRAs lose their tax exempt status du of the prohibited transaction provisions 40 of Section 4975 and Section 406 of ERISA. The condi-

- The IRA, Keogh, or SEP, the deposit balance of which is taken into account for purposes of determining eligibility to receive services at reduced or the cost, the established and maintained for the exclusive purpose of the participant covered under the established, or SEP Plan, his or her spouse or their beneficiaries;
- The services must be of the type that the bank itself could offer consistent with applicable federal and state banking law;
- The services are provide by the bank (or an affiliate of the bank) in the ordinary course of the bank's business to customers who qualify for reduced or no cost banking services but do not maintain an IRA, Keogh or SEP plan with the bank.
- For purpose of determining eligibility to receive services at reduced or no cost, the deposit balance required by the bank for the IRA or Keogh Plan is equal to the lowest balance required for any other type of account which the bank includes to determine eligibility to receive reduced or no cost services;
- The rate of return on the IRA, Keogh, or SEP Plan investment is no less favorable than the rate of return on an identical investment that could have been made at the same time at the same branch of the bank by a customer of the bank who is not eligible for (or who does not receive) reduced or no cost services.

The Department of Labor has issued several advisory opinions regarding IRA accounts. Some of the more recent advisory opinions that may be of relevance to financial institutions are listed below:

- Advisory Opinion 2005-10A issued May 11, 2005 When fees received by a bank or an aform a in connection with investments in certain mutual funds by IRAs or other qualified irremate plans, are offset against management fees charged by the bank to the plans, would the coupted offset avoid prohibited transactions under Code section 4975(c)(1)(E) or (F)?
- Advisery Chinion 2000-10A issued July 27, 2000 Whether allowing the owner of an IRA to direct to IRA to make in a limited partnership, in which relatives and the IRA owner in his individual aposity requirtners, will violate section 4975 of the Code?

REPORTING AND DECLOSUP REQUIREMENTS

Form 5498 – Section 408(i) or the ĸС 26 CFR § 1.408-5 requires the trustee of an IRA to make certain annual reports regarding le v 5 It the Secretary of the Treasury and to the individual for whom such account is maintained. The 1 contain information with respect to contributions and distributions aggregating \$10 or m lendar year. The report must be furnished to / in лу individuals no later than January 31 of each ar and to the IRS by June 1. Internal Revenue Service the orting requirements of 408(i) of the IRC. Form 5498 is the prescribed form for satisfyin, _nu⁄ et whe of the IRA account assets as of Form 5498 requires the trustee to provide a tair p December 31. This is a relatively easy task for transional inversents such as bank accounts and rque ssets are involved such as real marketable securities. It becomes much more difficult hen Fissue by closely held corporations. estate, notes receivable, limited partnerships, and securit According to an IRS interpretive letter issued to Partnership lue ins, Inc. dated February 24, 1993 the trustee or custodian is responsible for determining the fair market value of the IRA account assets and can't evade valuation responsibility by having the participant sign a release, indemnification or other waiver.

Form W-2P or Form 1099-R – Under 26 CFR § 1.408-7, the trustee of an IRA who makes a distribution during any calendar year to an individual from such account shall make a report on Form W-2P (in the case of distributions that are not total distributions) or Form 1099-R (in the case of total distributions). The report must show the name and address of the person to whom the distribution was made, the aggregate amount of such distribution, and such other information as is required on the form. A copy of the form must be given to the individual receiving the distribution by January 31 and a copy to the IRS by the end of February.

Statement of Required Minimum Distribution – Under 26 CFR § 1.408-8 Q-10, trustees and custodians of an IRA are required to report information to the IRA account holder with respect to the minimum amount required to be distributed from the IRA each calendar year. More information regarding the minimum distribution reporting requirement was furnished by the IRS in Notice 2002-27. In accordance with this notice, if a minimum distribution is required with respect to an IRA for a calendar year and the IRA owner is alive at the beginning of the year, the trustee/custodian that held the IRA as of December 31 of the prior year must provide a statement to the IRA owner by January 31

of the calendar year regarding the required minimum distribution in accordance with one of two alternatives.

<u>Alternative One</u> – An IRA trustee/custodian furnishes the IRA owner with a statement of the amount of the respect to the IRA for the calendar year and the date by which such mount must be distributed.

<u>Alternave Track</u> IRA trustee/custodian provides a statement to the IRA owner that: (1) Informs the IRA owner and a minimum distribution with respect to the IRA is required for the calendar year and the date by which such a point must be distributed and (2) includes an offer to furnish the IRA owner, upon request, with a calculation of the amount of the required minimum distribution with respect to the IRA for that a calculation.

Under both alternatives, the statement must also inform the IRA owner that the trustee/custodian will be reporting to the IRS on Form (198) that the IRA owner is required to receive a minimum distribution for the calendar year.

8-((d)(4)(ii)(A)(1), the trustee or custodian of an IRA **Disclosure Statement** – Under 2000F py of the trust agreement to the IRA account account shall furnish a disclosure stater l ar holder at least 7 days prior to the earlier of the date d establishment or purchase of the IRA account. However, the trustee/custodian does not have the account holder the disclosure statement to gi until the date the IRA account is established or purchas provided the IRA account holder is given at least 7 days from that date to revoke the IRA. The stee, usto n may choose to provide the IRA he rec account holder with an IRS publication that contains .ea. sclosure information in lieu of and the opy of the trust agreement are providing a disclosure statement. If the disclosure statement reiven the information 7 days after the mailed, then the regulations will deem the individual to have date of mailing. The disclosure statement must explain certain items in plain language. For example, the statement should explain when and how the IRA may be revoked, including the name, address, and telephone number of the person to receive the notice of cancellation. This explanation must appear at the beginning of the disclosure statement.

REGULATION R

Historically, banks enjoyed a blanket exemption from being required to register as a broker-dealer even though they engaged in securities activities. This was changed by the Gramm-Leach-Bliley Act (GLBA) and the Financial Services Regulatory Relief Act of 2006 (FSRRA) and now banks and federal savings associations must fit their securities activities under at least one of the various statutory exceptions or regulatory exemptions in order not to be required to register as a broker-dealer. In 2007, the Federal Reserve Board and the Securities and Exchange Commission issued rules that provided definitions to various terms in the statutory exceptions and also provided additional exemptions. These rules are known as Regulation R (Reg. R). Savings associations that continue to engage in securities that do not meet the conditions contained in the various exceptions and exemptions or are outside of the exceptions or exemptions must register with the SEC as a broker-dealer. What constitutes securities activities is quite broad.

Examiners need to have a basic understanding of Reg. R in order to recognize when it is applicable and to determine if the savings association meets the conditions contained in the various exceptions and exemptions.

Federacewings associations that offer services to individual retirement accounts that are invested in securies such as stocks, bonds, or mutual funds are subject to Reg. R and will be required to register as a proken aler suless the IRA activities comply with the terms of one of the statutory exceptions or regulatory examples. Which statutory exception or regulatory exemption may be utilized by the savings as reaction will depend on whether the savings association is designated as the trustee or custodian with rRAs morder to determine if the savings association is serving as trustee or custodian of its IRAs, look to the toppine of the model trust form that the savings association is utilizing.

If the savings association is a custodian that takes trading or investment orders from the IRA owner then it should utilize the speckeeping and custody exemption found in Regulation R.

If the savings association is a muster, and lkes direction from the IRA owner as to investment orders then it has a choice of utilizing the state of true activities exception (with terms defined by Regulation R) or the safekeeping and custody exerciption from an Regulation R. The statutory trust activities exception may be utilized by savings association even if they do not have fiduciary powers issued by OTS.

More details regarding Reg. R are located in other section of the Trust and Asset Management.

EXAMINATION PROCEDURE

EXAMINATION OBJECTIVES

WKP. REF.

LEVEL I

Level I procedures first focus on a review of the examination scoping materials. The next step consists of interviews with IRA account personnel to confirm their quality arous and levels of expertise; determine if the department's practices conform to written quide nes; chablish whether any significant changes in personnel, operations or business practices have occured; and determine whether new products or services have been introduced. If items of concentrate uncovered during Level I procedures, or if problems are identified during the preexamination monitoring and scoping, the examiner may need to perform certain Level II procedures.

- 1. Review examination scoping materials related to the provision of products and services to individual retirement accounts. Scoping material should include:
 - Savings association's risk profile.
 - Relevant PERK documents.
 - Previous examination report.
 - Work papers from the previous examination.
 - Copies of any prototype agreements or forms used by the savings association.
 - Board of Directors and other applicable committee minutes.

and are established and utilized effectively.

anagement reports are generated and utilized appropriately.

ement and administrative personnel are familiar with account details.

ient locumentation is maintained.

11. If IRA account a sets are invested in securities, determine if policies and procedures have been adopted the address compliance with broker-dealer exceptions and exemptions. Also determine a there is adequate documentation to demonstrate compliance with broker-dealer exceptions and exemptions.

The completion of the Level I proceeders ray provide sufficient information to make a determination that no further examination procedure are necessary. If no determination can be made, proceed to Level II.

LEVEL II

Level II procedures focus on an analysis of IRA account documes. The examiner should complete the appropriate Level II procedures when the completion of Level I procedures do not reveal adequate information on which to base a conclusion that the institution meets the examination objectives. Neither the Level I nor the Level II procedures involve significant verification.

- 12. Select a sample of accounts for review. A suggested sample might include a selection of new, seasoned and closed accounts or coverage from different administrative personnel or business locations. Also consider in the sample accounts holding unique assets, accounts for which complaints have been lodged with the savings association or accounts that exhibit identifiable concerns. Determine if:
 - Preacceptance process regarding disclosures and review of account assets was followed, particularly of accounts invested in unique assets.
