Section 1: Introduction

This PCLIA provides the following information regarding the system:

- (1) an overview of its purpose and functions;
- (2) a description of the information collected;
- (3) a description of the how information is maintained, used, and shared;
- (4) an assessment of whether the system is in compliance with federal requirements that support information privacy; and
- (5) an overview of the redress/complaint procedures available to individuals who may be affected by the use or sharing of information by the system.

Section 2: System Overview

Section 2.1: System Description and Purpose

System Description:

The Enterprise Search Platform (ESPL) sits in the Ashburn Datacenter and uses COTS vendor Lucidworks product called Fusion to provide a search platform solution. The production environment consists of 6 virtual windows clustered servers running windows server 2016, and Fusion COTS software with the Jetty web service and SOLR open-source search engine. There is no separate database software to manage the Fusion product. Network devices used to protect ESPL such as firewalls, routers, switches are managed via the Trusted Internet Connection (TIC) and are NOT included within the ESPL authorization boundary.

System Purpose:

The purpose of ESPL is to provide a search platform solution of websites for MCBS Users (SIS), Licensing Users (CATS) and Internal Users (OCCnet and el.occ = Examiner Library) (Public Affairs).

Licensing Users (CATS) and Internal Users (OCCnet and el.occ = Examiner Library) (Public Affairs)

Section 3: Information Collection

Section 3.1: Relevant and Necessary

Section	The PII maintained in this system or by this project is <u>not</u> exempt from 5 U.S.C. § 552a(e)(1), the Privacy Act's requirement that an agency "maintain in its records only such information about an individual as is relevant and necessary to accomplish a purpose of the agency required to be accomplished by statute or by executive order of the President." □ The PII maintained in this system or by this project <u>is</u> exempt from 5 U.S.C. § 552a(e)(1), because [See Appendix B for a list of acceptable bases for claiming this exemption and cut and paste here all that apply].
Section	n 3.1(b) Continuously Assessing Relevance and Necessity
1.	☐ The PII in the system is not maintained in a system of records. Therefore, the Privacy requirements do not apply. [Explain here what you do to ensure relevance and necessity despite the fact that the Privacy Act does not apply].
2.	☐ The PII in the system is maintained in a system of records, but the agency exempted these records from the relevance and necessity requirement. [Explain here what you do to ensure relevance and necessity to the extent possible despite the fact the records are exempt from this requirement].
3.	\Box The system owner conducted an assessment prior to collecting PII for use in the system.
4.	\Box With respect to PII <i>currently</i> maintained (as of the time this PCLIA is being done) in the system, the PII <i>[choose one]</i> \Box is \Box is not limited to only that which is relevant and necessary to meet the system's or project's mission requirements. During the PCLIA process, the system always undergoes a review to ensure the continuing relevance and necessity of the PII in the system.
5.	\square With respect to PII maintained in the system, there [choose one] \square is \square is not a process in place to continuously reevaluate and ensure that the PII remains relevant and

necessary. During the PCLIA process, the system always undergoes a review to ensure the continuing relevance and necessity of the PII on the system. If a determination is made that particular PII is no longer relevant and necessary in between PCLIA updates, this PCLIA will be updated at that time.
