Risk-Based Capital Guidelines; Capital Adequacy Guidelines; Capital Maintenance; Capital—Residential Mortgage Loans Modified Pursuant to the Home Affordable Mortgage Program
AGENCY: Office of the Comptroller of the Currency, Department of the Treasury; Board of Governors of the Federal Reserve System; Federal Deposit Insurance Corporation; and Office of Thrift Supervision, Department of the Treasury (the agencies).
ACTION: Final rule.
SUMMARY: The agencies have adopted a final rule to allow banks, savings associations, and bank holding companies (collectively, banking organizations) to risk weight for purposes of the agencies’ capital guidelines mortgage loans modified pursuant to the Home Affordable Mortgage Program (Program) implemented by the U.S. Department of the Treasury (Treasury) with the same risk weight assigned to the loan prior to the modification so long as the loan continues to meet other applicable prudential criteria.
DATES: The final rule becomes effective December 21, 2009.
FOR FURTHER INFORMATION CONTACT:
Board: Barbara J. Bouchard, Associate Director, (202) 452–3072, or William Tierney, Senior Supervisory Financial Analyst, (202) 872–7579, Division of Banking Supervision and Regulation; or April Snyder, Counsel, (202) 452–3099, or Benjamin W. McDonough, Counsel, (202) 452–2036, Legal Division. For the hearing impaired only, Telecommunication Device for the Deaf (TDD), (202) 263–4899.
OTS: Teresa A. Scott, Senior Policy Analyst, (202) 906–6478, Capital Risk, or Marvin Shaw, Senior Attorney, (202) 906–6639, Legislation and Regulation Division, Office of Thrift Supervision, 1700 G Street, NW., Washington, DC 20552.
SUPPLEMENTARY INFORMATION:
Background
Under the agencies’ general risk-based capital rules, loans that are fully secured by first liens on one-to-four family residential properties, that are either owner-occupied or rented, and that meet certain prudential criteria (qualifying mortgage loans) are risk-weighted at 50 percent.1 If a banking organization holds both a first-lien and a junior-lien mortgage on the same property, and no other party holds an intervening lien, the loans are treated as a single loan secured by a first-lien mortgage and risk-weighted at 50 percent if the two loans, when aggregated, meet the conditions to be a qualifying mortgage loan. Other junior-lien mortgage loans are risk-weighted at 100 percent.2
In general, to qualify for a 50 percent risk weight, a mortgage loan must have been made in accordance with prudent underwriting standards and may not be 90 days or more past due. Mortgage loans that do not qualify for a 50 percent risk weight are assigned a 100 percent risk weight. Each agency has additional provisions that address the risk weighting of mortgage loans. Under the OCC’s general risk-based capital rules for national banks, to receive a 50 percent risk weight, a mortgage loan must “not be on nonaccrual or restructured.”3 Under the Board’s general risk-based capital rules for bank holding companies and state member banks, mortgage loans must be “performing in accordance with their original terms” and not carried in nonaccrual status in order to receive a 50 percent risk weight.4 Generally, mortgage loans that have been modified are considered to have been restructured (OCC), or are not considered to be performing in accordance with their original terms (Board). Therefore, under the OCC’s and Board’s general risk-based capital rules, such loans generally must be risk weighted at 100 percent. Under the FDIC’s general risk-based capital rules, a state nonmember bank may assign a 50 percent risk weight to any modified mortgage loan, so long as the loan, as modified, is not 90 days or more past due or in nonaccrual status and meets other applicable criteria for a 50 percent risk weight.5 Under the OTS’s general risk-based capital rules, a savings association may assign a 50 percent risk weight to any modified residential mortgage loan, so long as the loan, as modified, is not 90 days or more past due and meets other applicable criteria for a 50 percent risk weight.6
On June 30, 2009, the agencies published in the Federal Register an interim final rule (interim rule) to allow banking organizations to risk weight mortgage loans modified under the Program using the same risk weight assigned to the loan prior to the modification, so long as the loan continues to meet other applicable

beneficial owner or owners of the mortgage. The agencies are now adopting the interim rule as a final rule (final rule) with changes that clarify the regulatory capital treatment of mortgage loans during the Program’s trial modification period (trial period). The revisions provided under the final rule relative to the FDIC’s and OTS’ general risk-based capital rules are clarifying in nature.

**Home Affordable Mortgage Program**

On March 4, 2009, Treasury announced guidelines under the Program to promote sustainable loan modifications for homeowners at risk of losing their homes due to foreclosure. The Program provides a detailed framework for servicers to modify mortgages on owner-occupied residential properties and offers financial incentives to lenders and servicers that participate in the Program. The Program also provides financial incentives for homeowners whose mortgages are modified pursuant to Program guidelines to remain current on their mortgages after modification. Taken together, these incentives are intended to help responsible homeowners remain in their homes and avoid foreclosure, which is intended to help ease the current downward pressures on house prices and the costs that families, communities, and the economy incur from unnecessary foreclosures.

Under the Program, Treasury has partnered with lenders and loan servicers to offer at-risk homeowners loan modifications under which the homeowners may obtain more affordable monthly mortgage payments. The Program applies to a spectrum of outstanding loans, some of which meet all of the prudential criteria under the agencies’ general risk-based capital rules and receive a 50 percent risk weight and some of which otherwise receive a 100 percent risk weight under the agencies’ general risk-based capital rules. Servicers who elect to participate in the Program are required to apply the Program guidelines to all eligible loans unless explicitly prohibited by the governing pooling and servicing agreement and/or other lender servicing agreements. If a mortgage loan qualifies for modification under the Program, the Program guidelines require the lender to first reduce payments on eligible first-lien loans to an amount representing no greater than a 31 percent front-end debt-to-income ratio. Treasury then will match further reductions in monthly payments with the lender dollar-for-dollar to achieve a 31 percent front-end debt-to-income ratio on the first-lien mortgage. Borrowers whose back-end debt-to-income ratio exceeds 55 percent must agree to work with a foreclosure prevention counselor approved by the Department of Housing and Urban Development.

In addition to the incentives for lenders, servicers, and homeowners, the Program provides a detailed framework for servicers to modify loans, servicers also will receive “Pay for Success” incentive payments of up to $1,000 per year for up to three years for first-lien mortgages as long as borrowers remain in the Program. A borrower can likewise receive “Pay for Performance Success” incentive payments that reduce the principal balance on the borrower’s first-lien mortgage up to $1,000 per year for up to five years if the borrower remains current on monthly payments on the modified first-lien mortgage. Lenders also may receive a home price depreciation reserve payment to offset costs associated on modified loan subsequently defaults.

For second-lien mortgages, lenders are eligible to receive incentive payments based on the difference between the interest rate on the modified first-lien mortgage and the reduced interest rate (either 1 percent or 2 percent) on the second-lien mortgage following modification. Servicers may receive a one-time $500 incentive payment for successful second-lien modifications, as well as additional incentive payments of up to $250 per year for up to three years for second-lien mortgages as long as both the modified first-lien and second-lien mortgages remain current.

Before a loan may be modified under the Program, a borrower must successfully complete a trial period of at least 90 days. During the trial period, a borrower makes payments on the eligible mortgage loan under modified terms. To complete the trial period successfully, the borrower must be current at the end of the trial period and provide certain information. The Program provides no incentive payments to the lender, servicer, or

---

7 74 FR 31160 (June 30, 2009); 74 FR 34499 (July 16, 2009) (OCC technical correction).
8 74 FR 34499 (July 16, 2009).
10 For ease of reference, the term “servicer” refers both to servicers that service loans held by other entities and to lenders who service loans that they hold themselves. The term “lender” refers to the beneficial owner or owners of the mortgage.
11 A separate aspect of the Program, the Home Affordable Refinance Program, also provides incentives for refinancing certain mortgage loans owned or guaranteed by Fannie Mae or Freddie Mac. This final rule does not apply to mortgage loans refinanced under the Home Affordable Refinance Program.
13 For a mortgage to be eligible for the Program, the property securing the mortgage loan must be a one-to-four family owner-occupied property that is the primary residence of the mortgagor. The property cannot be vacant or condemned, and the mortgage must have an unpaid principal balance (prior to capitalization of arrearages) at or below the Fannie Mae conforming loan limit for the type of property. A front-end debt-to-income ratio measures how much of the borrower’s gross (pretax) monthly income is represented by the borrower’s required payment on the first-lien mortgage, including real estate taxes and insurance.
14 To qualify for the Treasury match, servicers must follow an established sequence of actions (capitalize arrearages, reduce interest rate, extend term or amortization period, and then defer principal). The servicer will apply the front-end debt-to-income ratio on the loan from 38 percent to 31 percent. Servicers may reduce principal on the loan at any stage during the modification sequence to meet affordability targets. A back-end debt-to-income ratio measures how much of a borrower’s gross (pretax) monthly income would go toward monthly mortgage and nonmortgage debt service obligations.
15 A back-end debt-to-income ratio measures how much of a borrower’s gross (pretax) monthly income would go toward monthly mortgage and nonmortgage debt service obligations.
borrower during the trial period and no payments if the borrower does not successfully complete the trial period.

Comments on the Interim Rule

The agencies received six comments on the interim rule, one from a banking organization, four from trade groups representing the financial industry, and one from an individual. The commenters addressed the interim final rule unanimously supported it, asserting that it is consistent with the important policy objectives of the Program and does not compromise the goals of safety and soundness. Commenters requested that the agencies clarify whether the rule’s capital treatment is available for a mortgage loan that has been modified on a preliminary basis under the Program, but which still is within the trial period (and, thus, has not been permanently modified). Commenters also requested clarification regarding the circumstances under which a mortgage loan is risk weighted at 100 percent immediately prior to modification under the Program could receive a 50 percent risk weight. Some commenters suggested that such a loan should receive a 50 percent risk weight following completion of the trial period or following receipt of the first pay-for-performance incentive payments. Other commenters requested that the agencies clarify that a sustained period of repayment performance could include payments made after a loan had been modified under the Program. The agencies also received a comment on the interaction between private mortgage insurance and loan modifications, which was beyond the scope of the interim rule.

Based on an analysis of the comments, the agencies have modified the rule to specify that a mortgage modified on a permanent or trial basis pursuant to the Program and that was risk-weighted at 50 percent may continue to receive a 50 percent risk weight provided it meets other prudential criteria.

As noted in the preamble to the interim rule, under the agencies’ existing practice, past due and nonaccrual loans that receive a 100 percent risk weight may return to a 50 percent risk weight under certain circumstances, including after demonstration of a sustained period of repayment performance. Because borrower characteristics, such as debt service capacity, impact a borrower’s creditworthiness, the degree of appropriate reliance on a fixed period of repayment performance may vary for different borrowers.20 For these reasons, the agencies have not established a specific period of repayments that would constitute a “sustained period of performance” for a particular loan. The agencies confirm that a borrower’s payments on a mortgage loan modified under the Program, including during the trial period, may be considered in assessing whether the borrower has demonstrated a sustained period of repayment performance.

Commenters also requested that the agencies (1) allow a banking organization to risk weight at 50 percent, rather than 100 percent, a second-lien mortgage loan that is modified under the Program if the first-lien mortgage loan on the property is owned by another entity, that first-lien mortgage is also modified under the Program, and there is no intervening lien; and (2) allow loans modified pursuant to the Program or similar programs that continue to qualify for 50 percent risk weight to be excluded from troubled debt restructurings reported in quarterly bank regulatory reports. Under the general risk-based capital rules all second-lien mortgage loans receive a 100 percent risk weight, unless the banking organization that holds the loan also holds the first lien, there is no intervening lien, and the loan meets other prudential criteria. The agencies believe this treatment is commensurate with the risks of junior positions, as lenders have limited access to collateral in the event of default. Therefore, the agencies have determined that allowing a banking organization to risk weight junior-lien mortgage loans at less than 100 percent is not appropriate other than in those circumstances already permitted by the agencies general risk-based capital rules. With respect to whether mortgage loans modified under the Program are considered troubled debt restructurings, the question of how these loans should be classified and reported will be determined under generally accepted accounting principles.

Final Rule

Based on the above considerations, the agencies have adopted the interim rule in final form with the modification discussed above. Under the final rule as under the interim rule mortgage loans modified under the Program will retain the risk weight appropriate to the mortgage loan prior to modification, as long as other applicable prudential criteria remain satisfied. Accordingly, under the final rule, a qualifying mortgage loan appropriately risk weighted at 50 percent before modification under the Program would continue to be risk weighted at 50 percent during the trial period and after modification, providing it meets other prudential criteria. If a borrower does not successfully complete the trial period and the loan is not modified under the Program on a permanent basis, the loan would qualify for the 50 percent risk weight if it meets the conditions to be a qualifying mortgage loan under the general risk-based capital rules. If the loan does not meet the conditions, it would receive a 100 percent risk weight. A mortgage loan appropriately risk weighted at 100 percent prior to modification under the Program would continue to be risk weighted at 100 percent during and after the trial period.

Consistent with the OCC’s and the Board’s general risk-based capital rules, if a mortgage loan were to become 90 days or more past due or carried in nonaccrual status or otherwise restructured after being modified under the Program, the loan would be assigned a risk weight of 100 percent. Consistent with the FDIC’s general risk-based capital rules, if a mortgage loan were to again be restructured after being modified under the Program, the loan could be assigned a risk weight of 50 percent provided the loan, as modified, is not 90 days or more past due or in nonaccrual status and meets the other applicable criteria for a 50 percent risk weight. Consistent with the OTS’s general risk-based capital rules, if a mortgage loan were to again be restructured after being modified under the Program, the loan could be assigned a risk weight of 50 percent provided the loan, as modified, is not 90 days or more past due and meets the other applicable criteria for a 50 percent risk weight.

Additionally, in certain circumstances under the general risk-based capital rules (as with, for example, a direct credit substitute or modification), a banking organization is permitted to look through an exposure to the risk.

---

19 The agencies intended the interim rule to apply to loans modified on both a trial and permanent basis under the Program. Accordingly, the modifications to the final rule are clarifying in nature.

20 The instructions for the Consolidated Reports of Condition and Income (Call Report) and the Thrift Financial Report (TFR) define a sustained period of repayment performance as a period generally lasting “× 4 a minimum of six months and would involve payments of cash or cash equivalents. (In returning the asset to accrual status, sustained historical repayment performance for a reasonable time prior to the restructuring may be taken into account.)” Call Reports instructions are available at http://www.federalreserve.gov/reportforms/CategoryIndex.cfm?WhichCategory=3 and TFR instructions are available at http://files.ots.treas.gov/4210058.pdf.
small entity includes a commercial bank, bank holding company, or savings association with assets of $175 million or less (a small banking organization). As of June 30, 2009, approximately 2,533 small bank holding companies, 386 small savings associations, 749 small national banks, 432 small state member banks, and 3,040 small state nonmember banks existed. As a general matter, the Board’s general risk-based capital rules apply only to a bank holding company that has consolidated assets of $500 million or more. Therefore, the changes to the Board’s capital adequacy guidelines for bank holding companies will not affect small bank holding companies.

This rulemaking does not involve the issuance of a notice of proposed rulemaking and, therefore, the requirements of the RFA do not apply. However, the agencies note that the rule does not impose any additional obligations, restrictions, burdens, or reporting, recordkeeping or compliance requirements on banks or savings associations, including small banking organizations, nor does it duplicate, overlap or conflict with other federal rules. The rule also will benefit small banking organizations that are subject to the agencies’ general risk-based capital rules by allowing mortgage loans modified under the Program to retain the risk weight assigned to the loan prior to the modification.

Paperwork Reduction Act

In accordance with the requirements of the Paperwork Reduction Act of 1995 (44 U.S.C. 3506), the agencies have reviewed the final rule to assess any information collections. There are no collections of information as defined by the Paperwork Reduction Act in the final rule.

OCC/OTS Executive Order 12866

Executive Order 12866 requires federal agencies to prepare a regulatory impact analysis for agency actions that are found to be “significant regulatory actions.” Significant regulatory actions include, among other things, rulemakings that “have an annual effect on the economy of $100 million or more or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or state, local, or tribal governments or communities.” The OCC and the OTS each determined that its portion of the final rule is not a significant regulatory action under Executive Order 12866.

Board of Governors of the Federal Reserve System

12 CFR Chapter II

Authority and Issuance

For the reasons stated in the common preamble, the Board of Governors of Federal Reserve System amends parts 208 and 225 of Chapter II of title 12 of the Code of Federal Regulations as follows:

PART 208—MEMBERSHIP OF STATE BANKING INSTITUTIONS IN THE FEDERAL RESERVE SYSTEM (REGULATION H)

3. The authority for part 208 continues to read as follows:

4. In appendix A to part 208, revise Section III. C.3., to read as follows:

Appendix A to Part 208—Capital Adequacy Guidelines for State Member Banks: Risk-Based Measure

III. * * * *

Section 3. Risk Categories/Weights for On-Balance Sheet Assets and Off-Balance Sheet Items

* * * * *

(a) * * *

(3) Loans secured by first mortgages on one-to-four family residential properties, either owner occupied or rented, provided that such loans are not otherwise 90 days or more past due, or on nonaccrual or restructured. It is presumed that such loans will meet the prudent underwriting standards. For the purposes of the risk-based capital guidelines, a loan modified on a permanent or trial basis solely pursuant to the U.S. Department of Treasury’s Home Affordable Mortgage Program will not be considered to have been restructured. If a bank holds a first lien and junior lien on a one-to-four family residential property and no other party holds an intervening lien, the transaction is treated as a single loan secured by a first lien for the purposes of both determining the loan-to-value ratio and assigning a risk weight to the transaction. Furthermore, residential property loans made for the purpose of construction financing are assigned to the 50% risk category of section 3(a)(4) of this appendix A; however, these loans may be included in the 50% risk category of this section 3(a)(3) of this appendix A if they are subject to a legally binding sales contract and satisfy the requirements of section 3(a)(3)(iv) of this appendix A.

43. Loans included in this category must have been made in accordance with prudent underwriting standards; 44 be performing in accordance with their original terms; and not be 90 days or more past due or carried in nonaccrual status. For purposes of this 50 percent risk weight category, a loan modified on a permanent or trial basis solely pursuant to the U.S. Department of Treasury’s Home Affordable Mortgage Program will be considered to be performing in accordance with its original terms. The following additional criteria must also be applied to a loan secured by a multifamily residential property that is included in this category: all principal and interest payments on the loan must have been made on time for at least the year preceding placement in this category, or in the case where the existing property owner is refinancing a loan on that property, all principal and interest payments on the loan being refinanced must have been made on time for at least the year preceding placement in this category; amortization of the principal and interest must occur over a period of not more than 30 years and the minimum original maturity for repayment of principal must not be less than 7 years; and the annual net operating income (before debt service) generated by the property during its most recent fiscal year must not be less than 120 percent of the loan’s current annual debt service (115 percent if the loan is based on a floating interest rate) or, in the case of a cooperative or other not-for-profit housing project, the property must generate sufficient cash flow to provide comparable protection be treated by the selling bank as sold (and excluded from balance sheet assets) to the extent that the sales agreement provides for the purchaser of the loan to share in any loss incurred on the loan on a pro rata basis with the selling bank. In such a transaction, from the standpoint of the selling bank, the portion of the loan that is treated as sold is not subject to the risk-based capital standards. In connection with sales of multifamily housing loans in which the purchaser of a loan shares in any loss incurred on the loan with the selling institution on other than a pro rata basis, these other loss sharing arrangements are taken into account for purposes of determining the extent to which such loans are treated by the selling bank as sold (and excluded from balance sheet assets) under the risk-based capital framework in the same as prescribed for reporting purposes in the instructions to the Call Report.

43. Residential property loans that do not meet all the specified criteria or that are made for the purpose of speculative property development are placed in the 100 percent risk category.

44. Prudent underwriting standards include a conservative ratio of the current loan balance to the value of the property. In the case of a loan secured by multifamily residential property, the loan-to-value ratio is not conservative if it exceeds 80 percent (75 percent if the loan is based on a floating interest rate). Prudent underwriting standards also dictate that a loan-to-value ratio used in the case of originating a loan to acquire a property would not be deemed conservative unless the value is based on the lower of the acquisition cost of the property or appraised (or if appraised, evaluated) value. Otherwise, the loan-to-value ratio generally would be based upon the value of the property as determined by the most current appraisal, or if appropriate, the most current evaluation. All appraisals must be made in a manner consistent with the Federal banking agencies’ real estate appraisal regulations and guidelines and with the bank’s own appraisal guidelines.
to the institution. Also included in this category are privately-issued mortgage-backed securities provided that:

1. The structure of the security meets the criteria described in section III(B)(3) above; and
2. If the security is backed by a pool of conventional mortgages, on 1- to 4-family residential or multifamily residential properties each underlying mortgage meets the criteria described above in this section for eligibility for the 50 percent risk category at the time the pool is originated;
3. If the security is backed by privately issued mortgage-backed securities, each underlying security qualifies for the 50 percent risk category; and
4. If the security is backed by a pool of multifamily residential mortgages, principal and interest payments on the security are not 30 days or more past due.

Private-issued mortgage-backed securities that do not meet these criteria or that do not qualify for a lower risk weight are generally assigned to the 100 percent risk category.

Also assigned to this category are revenue (non-general obligation) bonds or similar obligations, including loans and leases, that are obligations of states or other political subdivisions of the U.S. (for example, municipal revenue bonds) or other countries of the OECD-based group, but for which the government entity is committed to repay the debt with revenues from the specific projects financed, rather than from general tax funds.

Credit equivalent amounts of derivative contracts involving standard risk obligors (that is, obligors whose loans or debt securities would be assigned to the 100 percent risk category) are included in the 50 percent category, unless they are backed by collateral or guarantees that allow them to be placed in a lower risk category.

* * *

PART 225—BANK HOLDING COMPANIES AND CHANGE IN BANK CONTROL (REGULATION Y)

5. The authority for part 225 continues to read as follows:

6. In Appendix A to part 225, revise section III.C.3., to read as follows:

Appendix A to Part 225—Capital Adequacy Guidelines for Bank Holding Companies: Risk-Based Measure

* * *

III. * * *

C. * * *

3. Category 3: 50 percent. This category includes loans fully secured by first liens on 1- to 4-family residential properties, either

If a banking organization holds the first and junior lien(s) on a residential property and no other party holds an intervening lien, the transaction is treated as a single loan secured by a first lien for the purposes of determining the loan-to-value ratio and assigning a risk weight.

48 If a banking organization holds the first and junior lien(s) on a residential property and no other party holds an intervening lien, the transaction is treated as a single loan secured by a first lien for the purposes of determining the loan-to-value ratio and assigning a risk weight.

49 Loans that qualify as loans secured by 1- to 4-family residential properties or multifamily residential properties are listed in the instructions to the FR Y–9C Report. In addition, for risk-based capital purposes, loans secured by 1- to 4-family residential properties include loans to builders with substantial project equity for the construction of 1- to 4-family residences that have been sold or leased, loans secured by multifamily residential property, and loans to builders with substantial project equity for the construction of 1- to 4-family residences that have been sold or leased.

50 Residential property loans that do not meet all the specified criteria or that are made for the purpose of speculative property development are placed in the 100 percent risk category.

51 Prudent underwriting standards include a conservative ratio of the current loan balance to the value of the property. In the case of a loan secured by multifamily residential property, the loan-to-value ratio is not conservative if it exceeds 80 percent (75 percent if the loan is based on a floating interest rate). Prudent underwriting standards also dictate that a loan-to-value ratio used in the case of originating a loan to acquire a property would not be deemed conservative unless the value is based on or the lower of the acquisition cost of the property appraised (or, if appraised, at an appraised value). Otherwise, the loan-to-value ratio generally would be based upon the value of the property as determined by the most current appraisal, or if appropriate, the appraised (or, if appraised, at an appraised value). All appraisals must be made in a manner consistent with the Federal banking agencies’ real estate appraisal regulations and guidelines and with the banking organization’s own appraisal guidelines.

52 Risk-Based Measure

53 Guidelines for Bank Holding Companies:

54 Appendix A to Part 225—Capital Adequacy

55 and 3909; 15 U.S.C. 1681s, 1681w, 6801 and 6805.

56 That qualify as loans secured by 1- to 4-family residential properties or multifamily residential properties are listed in the instructions to the FR Y–9C Report. In addition, for risk-based capital purposes, loans secured by 1- to 4-family residential properties include loans to builders with substantial project equity for the construction of 1- to 4-family residences that have been sold or leased, loans secured by multifamily residential property, and loans to builders with substantial project equity for the construction of 1- to 4-family residences that have been sold or leased.

57 Prudent underwriting standards include a conservative ratio of the current loan balance to the value of the property. In the case of a loan secured by multifamily residential property, the loan-to-value ratio is not conservative if it exceeds 80 percent (75 percent if the loan is based on a floating interest rate). Prudent underwriting standards also dictate that a loan-to-value ratio used in the case of originating a loan to acquire a property would not be deemed conservative unless the value is based on or the lower of the acquisition cost of the property appraised (or, if appraised, at an appraised value). Otherwise, the loan-to-value ratio generally would be based upon the value of the property as determined by the most current appraisal, or if appropriate, the appraised (or, if appraised, at an appraised value). All appraisals must be made in a manner consistent with the Federal banking agencies’ real estate appraisal regulations and guidelines and with the banking organization’s own appraisal guidelines.

**FEDERAL RESERVE SYSTEM**

12 CFR Part 226

[Regulation Z; Docket No. R–1378]

**Truth in Lending**

**AGENCY:** Board of Governors of the Federal Reserve System.

**ACTION:** Interim final rule; request for public comment.

**SUMMARY:** The Board is publishing for public comment an interim final rule amending Regulation Z (Truth in Lending). The interim rule implements Section 131(g) of the Truth in Lending Act (TILA), which was enacted on May 20, 2009, as Section 404(a) of the Helping Families Save Their Homes Act. TILA Section 131(g) became effective immediately upon enactment and established a new requirement for notifying consumers of the sale or transfer of their mortgage loans. The purchaser or assignee that acquires the loan must provide the required disclosures in writing no later than 30 days after the date on which the loan is sold or otherwise transferred or assigned. The Board is issuing this interim rule, effective immediately upon publication, so that parties subject to the statutory requirement have guidance on how to comply. However, to allow time for any necessary operational changes, compliance with the interim final rule is optional for 60 days from the date of publication; during this period, covered persons would continue to be subject to the statute’s requirements. The Board seeks comment on all aspects of the interim rule.

**DATES:** This interim final rule is effective November 20, 2009; however, to allow time for any necessary operational changes, compliance with this interim final rule is optional until January 19, 2010. Comments must be received on or before January 19, 2010.

**ADDRESSES:** You may submit comments, identified by Docket No. R–1378, by any of the following methods:

- **Federal eRulemaking Portal:** http://www.regulations.gov. Follow the instructions for submitting comments.
- **E-mail:** regs.comments@fedreserve.gov. Include the docket number in the subject line of the message.
- **Fax:** (202) 452–3819 or (202) 452–3102.
- **Mail:** Address to Jennifer J. Johnson, Secretary, Board of Governors of the Federal Reserve System, 20th Street and Constitution Avenue, NW., Washington, DC 20551.

All public comments will be made available on the Board’s Web site at http://www.federalreserve.gov/generalinfo/foia/ProposedRegs.cfm as submitted, unless modified for technical reasons. Accordingly, comments will not be edited to remove any identifying or contact information. Public comments may also be viewed electronically or in paper in Room MP–500 of the Board’s Martin Building (20th and C Streets, NW.) between 9 a.m. and 5 p.m. on weekdays.

**FOR FURTHER INFORMATION CONTACT:** Paul Mondor, Senior Attorney, or Stephen Shin, Attorney; Division of Consumer and Community Affairs, Board of Governors of the Federal Reserve System, 20th Street and Constitution Avenue, NW., Washington, DC 20551.

For users of Telecommunications Device for the Deaf (TDD) only, contact (202) 263–4525 or (202) 263–4510.

**SUPPLEMENTARY INFORMATION:**

I. **Background**

The Truth in Lending Act (TILA), 15 U.S.C. 1601 et seq., seeks to promote the informed use of consumer credit by requiring disclosures about its costs and terms. TILA requires additional disclosures for loans secured by consumers’ homes and permits consumers to rescind certain transactions that involve their principal dwelling. TILA directs the Board to prescribe regulations to carry out its purposes and specifically authorizes the Board, among other things, to issue regulations that contain such classifications, differentiations, or other provisions, or that provide for such
