Note: This document is an evaluation of this institution's record of meeting the credit needs of its entire community, including low- and moderate-income neighborhoods, consistent with safe and sound operation of the institution. This evaluation is not, and should not be construed as, an assessment of the financial condition of this institution. The rating assigned to this institution does not represent an analysis, conclusion, or opinion of the federal financial supervisory agency concerning the safety and soundness of this financial institution.

Overall CRA Rating

Institution’s CRA Rating: This institution is rated **Satisfactory**.

The Lending Test is rated: Satisfactory.

The major factors that support this rating include:

- The Lending Test rating is based on the state rating and the following overall conclusions:
 - The loan-to-deposit (LTD) ratio is more than reasonable.
 - A majority of the bank’s loans are inside the assessment area (AA).
 - The bank exhibits a reasonable distribution of loans to individuals of different income levels.

Loan-to-Deposit Ratio

Considering the bank’s size, financial condition, and credit needs of the AA, the bank’s LTD ratio is more than reasonable.

First Federal Savings and Loan Association’s (First Federal or bank) quarterly average LTD ratio over the 13 quarters since the previous Community Reinvestment Act (CRA) evaluation (December 31, 2018, to December 31, 2021) is 85.24 percent. The ratio ranged from a high of 97.47 percent as of December 31, 2019, to a low of 70.53 percent as of December 31, 2021. The bank’s quarterly average LTD ratio is more than reasonable when compared to financial institutions of similar size headquartered in the bank’s AA or surrounding counties (Crawford and Licking Counties, Ohio), which includes three financial institutions with total assets less than \$75 million. First Federal’s average LTD ratio is ranked the highest out of these similarly situated financial institutions. The other financial institutions have an average LTD ratio of 68.50 percent, ranging from 57.67 percent to 77.21 percent.

Lending in Assessment Area

A majority of the bank’s loans are inside its AA. The bank originated 60.9 percent of its total loans inside the bank’s AA during the evaluation period. This analysis is performed at the bank, rather than the AA, level.

Description of Institution

First Federal is a federally chartered mutual savings association headquartered in Centerburg, Ohio. There is no holding company or affiliates. Its main and only office is in Centerburg, Ohio in Knox County in an upper-income census tract (CT). The office location does not have a drive-up facility or automated teller machine (ATM). No offices have been opened or closed since the prior CRA evaluation in 2019.

As of December 31, 2021, First Federal had total assets of \$25.6 million with \$14.1 million in net loans and leases, \$20 million in total deposits, and \$5 million in tier 1 capital. There was no merger or acquisition activity that affected the scope of the bank's operations during the evaluation period.

First Federal is a single-state financial institution with one rating area (Ohio) and one AA in Ohio. The AA is in the Ohio Non-Metropolitan Statistical Area (non-MSA). The AA includes two CTs in Knox County (70 and 77) and one CT in Morrow County (9655). The CT in Morrow County is in the Columbus, OH MSA 18140; however, this CT does not extend substantially beyond the non-MSA boundary of Knox County. There is no branch in Morrow County. Therefore, it was included in the non-MSA AA. The AA is contiguous, meets the requirements of the regulation, and does not reflect illegal discrimination, nor does it arbitrarily exclude any low- and moderate-income (LMI) areas. The AA is further described in the "Scope of Evaluation" and "Description of Institution's Operations in Ohio" sections of this performance evaluation.

As of the December 31, 2021, Consolidated Reports of Condition and Income (Call Report) and Uniform Bank Performance Report, First Federal's net loans and leases represented 55 percent of total assets. The bank offers various lending and deposit products to serve its community. Deposit products include passbook savings accounts, money market accounts, and certificates of deposit. Loan products include primarily residential real estate loans. The bank does not offer online banking. The bank's primary lending focus is residential real estate (home mortgage) lending. The bank's loan portfolio, as of the December 31, 2021, Call Report, is comprised of 95.6 percent home mortgage loans, 3.5 percent commercial real estate (nonfarm nonresidential properties), and 0.9 percent consumer loans. During the evaluation period, 100 percent of all loan originations were home mortgage loans. First Federal did not make any commercial, farm, or consumer loans during the evaluation period.

There are no financial, legal, or other factors that impede the bank's ability to help meet the credit needs of its AA. First Federal's previous CRA rating was Satisfactory as of the CRA Performance Evaluation dated January 7, 2019.

Scope of the Evaluation

Evaluation Period/Products Evaluated

The Office of the Comptroller of the Currency (OCC) conducted a CRA performance evaluation to assess the bank's record of meeting the credit needs of its entire community, including LMI areas. The OCC used small bank CRA evaluation procedures to assess the bank's performance under the Lending Test. The evaluation period was from January 1, 2019, to December 31, 2021.

The OCC evaluated the bank's lending performance based on its primary lending product, home mortgage loans. The bank does not offer non-residential lending products. For the Lending Test, the OCC evaluated all home mortgage loans originated in 2019, 2020, and 2021.

For analysis purposes, the OCC compared the bank's lending performance with demographic data from the 2015 American Community Survey (ACS) U.S. Census data. No affiliate activity was included in this analysis. Refer to the table in appendix A, Scope of the Examination, for more information on the scope of the review.

Selection of Areas for Full-Scope Review

In each state where the bank has an office, one or more of the AAs within that state was selected for a full-scope review. For purposes of this evaluation, bank delineated AAs located within the same MSA, multistate metropolitan statistical area (MMSA), or combined statistical area (CSA) are combined and evaluated as a single AA. Similarly, bank delineated non-MSA AAs within the same state are combined and evaluated as a single area. These combined AAs may be evaluated as full- or limited-scope. Refer to the "Scope" section under each State Rating for details regarding how full-scope AAs were selected. Refer to appendix A, Scope of Examination, for a list of full- and limited-scope AAs.

First Federal has one AA, the Ohio Non-MSA AA, as described above under the "Description of Institution" section. The OCC completed a full-scope review for the Ohio Non-MSA AA. A description of the Ohio Non-MSA AA is also provided in the "Description of Institutions Operations in Ohio" section of this evaluation.

Ratings

The bank's overall rating is a blend of the state ratings. Since all the bank's offices are in Ohio, the bank's rating is based on performance solely in Ohio.

Refer to the "Scope" section under the state rating for details regarding how the areas were weighted in arriving at the respective ratings.

Discriminatory or Other Illegal Credit Practices Review

Pursuant to 12 CFR 25.28(c) or 195.28(c), respectively, in determining a national bank's or federal savings association's (collectively, bank) CRA rating, the OCC considers evidence of discriminatory or other illegal credit practices in any geography by the bank, or in any AA by an affiliate whose loans have been considered as part of the bank's lending performance. As part of this evaluation process, the OCC consults with other federal agencies with responsibility for compliance with the relevant laws and regulations, including the U.S. Department of Justice, the U.S. Department of Housing and Urban Development, and the Consumer Financial Protection Bureau, as applicable.

The OCC has not identified that this institution has engaged in discriminatory or other illegal credit practices that require consideration in this evaluation.

The OCC will consider any information that this institution engaged in discriminatory or other illegal credit practices, identified by or provided to the OCC before the end of the institution's next performance evaluation in that subsequent evaluation, even if the information concerns activities that occurred during the evaluation period addressed in this performance evaluation.

State Rating

State of Ohio

CRA rating for the State of Ohio¹: Satisfactory.

The Lending Test is rated: Satisfactory.

The major factors that support this rating include:

- The bank exhibits a reasonable distribution of loans to individuals of different income levels.
- The bank has not received any complaints about its performance in helping to meet the AA's credit needs during the evaluation period.

Description of Institution's Operations in Ohio

First Federal has one AA (Ohio Non-MSA AA) comprised of two CTs within Knox County (70 and 77) and one CT in Morrow County (9655). The CT in Morrow County is in the Columbus, OH MSA 18140; however, this CT does not extend substantially beyond the non-MSA boundary of Knox County and was therefore considered within the Ohio Non-MSA AA. The bank operates out of a single location, located within an upper-income tract. The office does not have a drive-up location or ATM. The AA is contiguous, meets the requirements of the regulation, and does not arbitrarily exclude any LMI areas.

As of the 2015 ACS U.S. Census data in the table below, the population of the Ohio Non-MSA AA is 16,004, with 60.3 percent of the population living in middle-income CTs and 39.7 percent in upper-income CTs. As of the 2015 ACS U.S. Census, the AA consists of 3 CTs, and is comprised of two middle-income and one upper-income CT. The AA includes 4,191 families and 5,534 households. There were no CT classification changes and no designated distressed or underserved CTs in the AA during the evaluation period.

According to the 2015 ACS U.S. Census data, the median housing value is \$154,836. With the median family income for non-MSAs in Ohio of \$55,785, moderate-income families make less than \$44,628 annually and low-income families make less than \$27,893 annually. Median housing values are 5.6 times the annual income of low-income families and 3.5 times the annual income of moderate-income families. Thus, the cost of housing may create a significant financial barrier to homeownership among these families. The 2015 ACS U.S. Census data shows that there are 6,066 total housing units in the Ohio Non-MSA AA, of which 75.4 percent are owner-occupied, 15.8 percent are rental occupied, and 8.8 percent are vacant units. Additionally, 8.2 percent of the families live below the poverty level, making it especially difficult for this segment of the population to afford and maintain a home or qualify for a loan.

The economic conditions in the Ohio Non-MSA AA are generally stable. During the evaluation period of 2019, 2020, and 2021, the economic conditions remained consistent. Unemployment was low with many of the higher paying jobs residing in Columbus, Ohio. According to the Ohio Department of Job

¹ This rating reflects performance within the state. The statewide evaluations do not reflect performance in the parts of those states contained within a MMSA.

and Family Services/Office of Workforce Development – Bureau of Labor Market Information as of December 2021, the “not seasonally adjusted” unemployment rates were 2.9 percent in Knox County and 3.3 percent in Morrow County, which are reasonable when compared with the State of Ohio unemployment rate of 3.4 percent for the same period. The economy in the AA is reasonably diversified. Top industries include education, law, and banking. Top employers in the AA include Centerburg Local Schools, Highland Local Schools, Cooper, Adel, & Associates, Centerburg Post Office, and Park National Bank. Many individuals in the AA travel to Columbus, Ohio, for employment. Columbus is approximately 30 miles southwest of Centerburg and is outside of the AA. Additionally, Mount Vernon, Ohio is home to Ariel Corp. and other manufacturing jobs, located approximately 11 miles northeast of Centerburg. Mount Vernon is also outside the AA.

Competition for deposits in the AA is strong. Competition is comprised of local community banks, credit unions, and branches of larger financial institutions. According to the June 30, 2021, Deposit Market Share Reports from the Federal Deposit Insurance Corporation (FDIC), 14 financial institutions with 25 offices operated within Knox and Morrow Counties. First Federal holds the tenth largest deposit market share at 1.4 percent, with \$19.8 million in deposits. The bank’s primary competitors include financial institutions with significant deposit activity in the AA such as Park National Bank, PNC Bank, National Association (N.A.), CNB Bank, Huntington National Bank, and JPMorgan Chase Bank, N.A., with these five holding an 80 percent deposit market share.

As stated above, First Federal’s primary business focus is home mortgage lending. First Federal is exempt from Home Mortgage Disclosure Act (HMDA) reporting; therefore, First Federal is not included in the market share data. However, their 2021 lending places them with an estimated 0.45 percent market share. The top five lenders account for 29.8 percent of the home mortgage market share, with 171 HMDA reporting institutions based on 2021 Peer Mortgage Data and 2015 ACS U.S. Census data. The top five mortgage lenders in the AA include Park National Bank, Huntington National Bank, Rocket Mortgage, Union Home Mortgage, and JPMorgan Chase Bank, N.A.

As part of the CRA performance evaluation, the OCC reviewed information provided from one interview with a representative from an affordable housing organization. The contact identified affordable housing as a need in the community, as well as rehabilitation on existing affordable housing as well as financial literacy programs. In general, local financial institutions are adequately meeting the credit and community development needs of the community.

Scope of Evaluation in Ohio

The OCC performed a full-scope review of the Ohio Non-MSA AA. The data in the AA was analyzed and presented as one AA for the purposes of this evaluation. Home mortgage lending is the bank's primary lending product and was evaluated under the Lending Test. As discussed above, the OCC transaction tested all (46 loans) home mortgage loans for 2019, 2020, and 2021, with 28 of the 46 home mortgage loans originated inside the AA. Since there is one primary product and one AA, weighting is not applicable.

LENDING TEST

The bank's performance under the Lending Test in Ohio is rated Satisfactory.

Conclusions for Area Receiving a Full-Scope Review

Based on a full-scope review, the bank's performance in the Ohio Non-MSA AA is adequate.

Distribution of Loans by Income Level of the Geography

The OCC did not perform an analysis of the geographic distribution of loans as part of this review. As of the 2015 ACS U.S. Census, there are no LMI CTs in the bank's AA. There are two middle-income CTs and one upper-income CT in the AA. First Federal operates a single location in Knox County. Since the AA does not include any LMI CTs, a review of the geographic distribution of loans would not be meaningful.

Home Mortgage Loans

Refer to Table O in the State of Ohio section of appendix D for the facts and data used to evaluate the geographic distribution of the bank's home mortgage loan originations and purchases.

The bank's AA is comprised entirely of middle- and upper-income CTs. Since the AA does not include any LMI CTs, a review of the geographic distribution of loans would not be meaningful. The lending analysis reflected lending in all CTs.

Lending Gap Analysis

Overall, the OCC did not identify any unexplained, conspicuous gaps in the lending distribution during the review of the bank's reports and maps.

Distribution of Loans by Income Level of the Borrower

The bank exhibits a reasonable distribution of loans to individuals of different income levels given the product lines offered by the bank.

In evaluating the borrower income distribution of home mortgage loans, the OCC considered the level of competition and its effect on limiting the bank's ability to lend to borrowers of different income levels, as well as the economic conditions and demographic data in the AA. The OCC also considered the percentage of families that live below the poverty level, and the barriers this creates for these families to qualify for home mortgage financing.

Home Mortgage Loans

Refer to Table P in the State of Ohio section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases.

The OCC compared the percentage of home mortgage loans originated by the bank to low-, moderate-, middle-, and upper-income borrowers to the percentage distribution of families by income level (demographic data), placing emphasis on lending to LMI families. The OCC also compared the bank's performance against home mortgage loans of other home mortgage lenders (aggregate data), as demonstrated by HMDA aggregate data.

For loans originated in the evaluation period, First Federal's percentage of home mortgage loans to low-income borrowers equals aggregate data and is below demographic data. First Federal's percentage of home mortgage loans to moderate-income borrowers is well below both aggregate and demographic data. Overall, the bank exhibits a reasonable distribution of home mortgage loans among borrowers of different income levels within the AA given the performance context factors discussed below.

The OCC considered other factors in the bank's performance during the evaluation period, including the cost of homeownership in the AA as an obstacle to homeownership for LMI borrowers. First Federal has limited lending opportunities due to asset size and market presence. The small number of loans originated paired with their AA geography limits the bank's opportunities to lend to LMI borrowers. Over the evaluation period, management originated an additional 18 loans outside of the AA, with 22.2 percent of those loans to LMI borrowers. As stated above, overall median housing values are 3.5 to 5.6 times the weighted average of median family income of LMI families in the AA. This obstacle may result in fewer opportunities to originate mortgage loans to LMI families. Approximately 8.2 percent of the families live below the poverty level. Additionally, there is strong competition for loans in the Ohio Non-MSA AA. First Federal's is exempt from HMDA reporting; therefore, the bank is not included in the market share data. However, their 2021 lending places them with an estimated 0.45 percent market share. The top five lenders account for 29.8 percent of the market share, with 171 HMDA reporting institutions. The top five include financial institutions much larger than First Federal.

Responses to Complaints

First Federal has not received any complaints about its performance in helping to meet the AA's credit needs during the evaluation period.

Appendix A: Scope of Examination

The following table identifies the time period covered in this evaluation, affiliate activities that were reviewed, and loan products considered. The table also reflects the MSAs and non-MSAs that received comprehensive examination review, designated by the term “full-scope,” and those that received a less comprehensive review, designated by the term “limited-scope”.

Appendix B: Summary of State Ratings

RATINGS: FIRST FEDERAL SAVINGS AND LOAN ASSOCIATION	
Overall Bank:	Lending Test Rating
First Federal Savings and Loan Association (First Federal)	Satisfactory
State:	
Ohio	Satisfactory

Appendix C: Definitions and Common Abbreviations

The following terms and abbreviations are used in this performance evaluation, including the CRA tables. The definitions are intended to provide the reader with a general understanding of the terms, not a strict legal definition.

Affiliate: Any company that controls, is controlled by, or is under common control with another company. A company is under common control with another company if the same company directly or indirectly controls both companies. For example, a bank subsidiary is controlled by the bank and is, therefore, an affiliate.

Aggregate Lending (Aggt.): The number of loans originated and purchased by all reporting lenders (HMDA or CRA) in specified income categories as a percentage of the aggregate number of loans originated and purchased by all reporting lenders in the state/assessment area.

Census Tract (CT): A small, relatively permanent statistical subdivision of a county delineated by a local committee of census data users for the purpose of presenting data. Census tracts nest within counties, and their boundaries normally follow visible features, but may follow legal geography boundaries and other non-visible features in some instances, Census tracts ideally contain about 4,000 people and 1,600 housing units.

Combined Statistical Area (CSA): A geographic entity consisting of two or more adjacent Core Based Statistical Areas with employment interchange measures of at least 15. An employment interchange measure is a measure of ties between two adjacent entities. The employment interchange measure is the sum of the percentage of workers living in the smaller entity who work in the larger entity and the percentage of employment in the smaller entity that is accounted for by workers who reside in the larger entity.

Community Development (CD): Affordable housing (including multifamily rental housing) for low- or moderate-income individuals; community services targeted to low- or moderate-income individuals; activities that promote economic development by financing businesses or farms that meet Small Business Administration Development Company or Small Business Investment Company programs size eligibility standards or have gross annual revenues of \$1 million or less; or activities that revitalize or stabilize low- or moderate-income geographies, distressed or underserved nonmetropolitan middle-income geographies, or designated disaster areas.

Community Reinvestment Act (CRA): The statute that requires the OCC to evaluate a bank's record of meeting the credit needs of its entire community, including LMI areas, consistent with the safe and sound operation of the bank, and to take this record into account when evaluating certain corporate applications filed by the bank.

Consumer Loan(s): A loan(s) to one or more individuals for household, family, or other personal expenditures. A consumer loan does not include a home mortgage, small business, or small farm loan. This definition includes the following categories: motor vehicle loans, credit card loans, other secured consumer loans, and other unsecured consumer loans.

Family: Includes a householder and one or more other persons living in the same household who are related to the householder by birth, marriage, or adoption. The number of family households always equals the number of families; however, a family household may also include non-relatives living with the family. Families are classified by type as either a married-couple family or other family, which is further classified into ‘male householder’ (a family with a male householder’ and no wife present) or ‘female householder’ (a family with a female householder and no husband present).

Full-Scope Review: Performance under the Lending, Investment, and Service Tests is analyzed considering performance context, quantitative factors (e.g., geographic distribution, borrower distribution, and total number and dollar amount of investments), and qualitative factors (e.g., innovativeness, complexity, and responsiveness).

Geography: A census tract delineated by the United States Bureau of the Census in the most recent decennial census.

Home Mortgage Disclosure Act (HMDA): The statute that requires certain mortgage lenders that conduct business or have banking offices in a metropolitan statistical area to file annual summary reports of their mortgage lending activity. The reports include such data as the race, gender, and the income of applicants, the amount of loan requested, the disposition of the application (e.g., approved, denied, and withdrawn), the lien status of the collateral, any requests for preapproval, and loans for manufactured housing.

Home Mortgage Loans: A closed-end mortgage loan or an open-end line of credit as these terms are defined under 12 CFR 1003.2, and that is not an excluded transaction under 12 CFR 1003.3(c)(1) through (c)(10) and (c)(13).

Household: Includes all persons occupying a housing unit. Persons not living in households are classified as living in group quarters. In 100 percent tabulations, the count of households always equals the count of occupied housing units.

Limited-Scope Review: Performance under the Lending, Investment, and Service Tests is analyzed using only quantitative factors (e.g., geographic distribution, borrower distribution, total number and dollar amount of investments, and branch distribution).

Low-Income Individual: Individual income that is less than 50 percent of the area median income.

Low Income Geography: A census tract with a median family income that is less than 50 percent.

Market Share: The number of loans originated and purchased by the institution as a percentage of the aggregate number of loans originated and purchased by all reporting lenders in the state/assessment area.

Median Family Income (MFI): The median income determined by the U.S. Census Bureau every five years and used to determine the income level category of geographies. The median is the point at which half of the families have income above, and half below, a range of incomes. Also, the median income determined by the Federal Financial Institutions Examination Council (FFIEC) annually that is used to determine the income level category of individuals. For any given area, the median is the point at which half of the families have income above, and half below, a range of incomes.

Metropolitan Division (MD): As defined by Office of Management and Budget, a county or group of counties within a Core Based Statistical Area that contains an urbanized population of at least 2.5 million. A Metropolitan Division consists of one or more main/secondary counties that represent an employment center or centers, plus adjacent counties associated with the main/secondary county or counties through commuting ties.

Metropolitan Statistical Area (MSA): An area, defined by the Office of Management and Budget, as a core based statistical area associated with at least one urbanized area that has a population of at least 50,000. The Metropolitan Statistical Area comprises the central county or counties containing the core, plus adjacent outlying counties having a high degree of social and economic integration with the central county or counties as measured through commuting.

Middle-Income: Individual income that is at least 80 percent and less than 120 percent of the area median income, or a median family income that is at least 80 percent and less than 120 percent, in the case of a geography.

Moderate-Income: Individual income that is at least 50 percent and less than 80 percent of the area median income, or a median family income that is at least 50 percent and less than 80 percent, in the case of a geography.

Multifamily: Refers to a residential structure that contains five or more units.

Owner-Occupied Units: Includes units occupied by the owner or co-owner, even if the unit has not been fully paid for or is mortgaged.

Qualified Investment: A qualified investment is defined as any lawful investment, deposit, membership share, or grant that has as its primary purpose community development.

Rating Area: A rated area is a state or multi-state metropolitan statistical area. For an institution with domestic branches in only one state, the institution's CRA rating would be the state rating. If an institution maintains domestic branches in more than one state, the institution will receive a rating for each state in which those branches are located. If an institution maintains domestic branches in two or more states within a multi-state metropolitan statistical area, the institution will receive a rating for the multi-state metropolitan statistical area.

Small Loan(s) to Business(es): A loan included in 'loans to small businesses' as defined in the Consolidated Report of Condition and Income (Call Report) instructions. These loans have original amounts of \$1 million or less and typically are either secured by nonfarm or nonresidential real estate or are classified as commercial and industrial loans.

Small Loan(s) to Farm(s): A loan included in 'loans to small farms' as defined in the instructions for preparation of the Consolidated Report of Condition and Income (Call Report). These loans have original amounts of \$500,000 or less and are either secured by farmland, or are classified as loans to finance agricultural production and other loans to farmers.

Tier 1 Capital: The total of common shareholders' equity, perpetual preferred shareholders' equity with non-cumulative dividends, retained earnings and minority interests in the equity accounts of consolidated subsidiaries.

Upper-Income: Individual income that is at least 120 percent of the area median income, or a median family income that is at least 120 percent, in the case of a geography.

Appendix D: Tables of Performance Data

Content of Standardized Tables

A separate set of tables is provided for each state. All multistate metropolitan statistical areas, if applicable, are presented in one set of tables. References to the “bank” include activities of any affiliates that the bank provided for consideration (refer to appendix A: Scope of the Examination). For purposes of reviewing the Lending Test tables, the following are applicable: (1) purchased are treated as originations; and (2) “aggregate” is the percentage of the aggregate number of reportable loans originated and purchased by all HMDA or CRA-reporting lenders in the MMSA/assessment area. Deposit data are compiled by the FDIC and are available as of June 30th of each year. Tables without data are not included in this PE.

The following is a listing and brief description of the tables included in each set:

- Table O. Assessment Area Distribution of Home Mortgage Loans by Income Category of the Geography** - Compares the percentage distribution of the number of loans originated and purchased by the bank in low-, moderate-, middle-, and upper-income geographies to the percentage distribution of owner-occupied housing units throughout those geographies. The table also presents aggregate peer data for the years the data is available.
- Table P. Assessment Area Distribution of Home Mortgage Loans by Income Category of the Borrower** - Compares the percentage distribution of the number of loans originated and purchased by the bank to low-, moderate-, middle-, and upper-income borrowers to the percentage distribution of families by income level in each MMSA/assessment area. The table also presents aggregate peer data for the years the data is available.
- Table Q. Assessment Area Distribution of Loans to Small Businesses by Income Category of the Geography** - The percentage distribution of the number of small loans (less than or equal to \$1 million) to businesses that were originated and purchased by the bank in low-, moderate-, middle-, and upper-income geographies compared to the percentage distribution of businesses (regardless of revenue size) in those geographies. Because aggregate small business data are not available for geographic areas smaller than counties, it may be necessary to compare bank loan data to aggregate data from geographic areas larger than the bank’s assessment area.
- Table R. Assessment Area Distribution of Loans to Small Businesses by Gross Annual Revenue** - Compares the percentage distribution of the number of small loans (loans less than or equal to \$1 million) originated and purchased by the bank to businesses with revenues of \$1 million or less to: 1) the percentage distribution of businesses with revenues of greater than \$1 million; and, 2) the percentage distribution of businesses for which revenues are not available. The table also presents aggregate peer small business data for the years the data is available.

The total loan amount presented in the tables for each assessment area may differ from the total loan amount reported in the aggregate table due to how the underlying loan data is rounded in each table.

- Table S. Assessment Area Distribution of Loans to Farms by Income Category of the Geography** - The percentage distribution of the number of small loans (less than or equal to \$500,000) to farms originated and purchased by the bank in low-, moderate-, middle-, and upper-income geographies compared to the percentage distribution of farms (regardless of revenue size) throughout those geographies. The table also presents aggregate peer data for the years the data is available. Because aggregate small farm data are not available for geographic areas smaller than counties, it may be necessary to use geographic areas larger than the bank’s assessment area.
- Table T. Assessment Area Distribution of Loans to Farms by Gross Annual Revenues -** Compares the percentage distribution of the number of small loans (loans less than or equal to \$500 thousand) originated and purchased by the bank to farms with revenues of \$1 million or less to: 1) the percentage distribution of farms with revenues of greater than \$1 million; and, 2) the percentage distribution of farms for which revenues are not available. The table also presents aggregate peer small farm data for the years the data is available.
- Table U. Assessment Area Distribution of Consumer Loans by Income Category of the Geography** - Compares the percentage distribution of the number of loans originated and purchased by the bank in low-, moderate-, middle-, and upper-income geographies to the percentage distribution of households in those geographies.
- Table V. Assessment Area Distribution of Consumer Loans by Income Category of the Borrower** - Compares the percentage distribution of the number of loans originated and purchased by the bank to low-, moderate-, middle-, and upper-income borrowers to the percentage distribution of households by income level in each MMSA/assessment area.

The total loan amount presented in the tables for each assessment area may differ from the total loan amount reported in the aggregate table due to how the underlying loan data is rounded in each table.

State of Ohio

Table O: Assessment Area Distribution of Home Mortgage Loans by Income Category of the Geography																				2019-21
